Profile

Design Engineer working between product design and frontend engineering, translating design intent into accessible, responsive, production-ready interfaces. Currently contributing to the Cloudflare dashboard and Kumo component library, with experience in React, TypeScript, SvelteKit, design systems, interaction design, performance, and UX research.

Education

BSc University of Porto, Informatics and Computing Engineering Sep 2023 - Jul 2026

- Coursework: Web Technologies, HCI, Databases, Software Engineering

Experience

Cloudflare, Software Engineer Intern, Design Engineering Lisboa, Portugal
Jul 2026 - Sep 2026

- Contributing to the Cloudflare dashboard as part of the Design Engineering team, building production interfaces for a platform used by millions of people.
- Contributing to Kumo, Cloudflare's open-source React component library, to improve UI consistency, accessibility, and developer experience across dashboard products.

NIAEFEUP, Project Manager, Time Table Selector (TTS) Porto, Portugal
May 2026 - Present

- tts.niafeup.pt - Leading the development and continuous improvement of TTS, an open-source React web app that streamlines academic scheduling for University of Porto students.
- Coordinating contributors and translating student needs into product and engineering priorities.

INESC TEC, UX Researcher (Research Grant) Porto, Portugal
May 2026 - Jul 2026

- Developed a technical report assessing UX within the VAXPRED project and recommending strategic improvements.
- Conducted user research and data analysis to inform UI/UX decisions in an R&D environment.

Xarevision, Junior Software Engineer Porto, Portugal
Nov 2025 - Jan 2026

- Engineered PHP microservices and maintained Android applications for Sonae retail systems using Docker and PostgreSQL.

Significa, Frontend Developer Intern Porto, Portugal
Jul 2025 - Aug 2025

- Continued development of Dodia and Significa's website with SvelteKit.
- Improved UI interactions, component architecture, routing, and frontend performance.

F1 In Schools | CTCOR, Engineering Judge Santa Maria da Feira, Portugal
May 2025 - May 2026

- Part of the judging panel for the F1 in Schools 2025 and 2026 competitions, evaluating engineering design and innovation in student projects
- Providing feedback and mentorship to aspiring engineers, fostering creativity and technical excellence in the next generation

Significa, Full Stack Developer Intern (Curricular) Porto, Portugal
Feb 2025 - Jun 2025

- dodia.pt - Built Dodia from the ground up as a production restaurant menu platform.
- Architected its full-stack system with Next.js, TypeScript, Drizzle ORM, and PostgreSQL.

Selected Work

Personal Portfolio pedrolunet.dev

- Designed and built an interactive portfolio with SvelteKit, TypeScript, Tailwind CSS, and GSAP, focusing on responsive motion, accessibility, and performance.

Dot Journal journal.pedrolunet.dev

- Designed and engineered a local-first journal with Svelte 5 and TypeScript, using a custom grid-based timeline and color-coded entries for fast visual navigation.

Technical & Design Skills

Design & Product: Figma, Prototyping, Design Systems, Accessibility, UX Research

Frontend: React, Next.js, SvelteKit, React Native, Tailwind CSS, HTML, CSS

Languages & Data: TypeScript, JavaScript, SQL, PHP, C, C++

Backend & Tools: PostgreSQL, Drizzle ORM, Laravel, Docker, Git
